LTMA CB RISK	L	0500-1600	M	M	M	M
SIG WIND CHANGE***	N		N	N	N	Y (0600-0900)
AMPLIFYING COMMENTS	Cloudy to start with a low risk of patchy drizzle. Cloud breaks developing at times throughout the day as a waving frontal system remains over the region. Rainfall accumulations today are likely to remain light but there is a very low risk of a heavier burst from an embedded CB in the LTMA. (Low risk of CBs mainly confined towards the north of the LTMA.) Gentle to moderate SW'ly winds, with a low risk of isolated gusts 20-24 KT from late morning onwards.		Thursday: Light SW'ly winds brings a risk of low cloud (Risk VIS2) arriving over the airfield in the early hours. This will quickly lift and break by mid-morning to leave a settled and bright day. Feeling warm as temperatures rise. A medium risk of elevated CBs in the LTMA to be confined towards the SE of the LTMA (extending into the channel). Light SW'ly winds picking up into a gentle to moderate breeze by mid-morning. L risk VIS2 03-07 Z. L risk CBs in SE LTMA 11-24 Z, M risk CBs in SE LTMA 13-20 Z Friday & Saturday: Clear spells brings a low risk of fog/low cloud (LVP/VIS2 risk) in the early hours of both Friday and Saturday, likely to quickly lift and clear by mid-morning latest to leave bright and hot days. A risk of elevated CBs in the LTMA (mainly SE). Gentle to moderate SW to W'ly winds. Sunday: A bright and settled day with light NNW'ly winds becoming E'ly by mid-morning. Likely dry with risk of elevated CBs in the LTMA, likely to be confined towards the SE.			

LVP Risk Percentages				
NIL (N) = <5%	LOW (L) = 5-29%	MEDIUM LOW (ML) = 30-39%	MEDIUM HIGH (MH) = 40-59%	HIGH (H) = 60-89%
VERY HIGH (VH) = >90%				
LTMA CB Risk Percentages				
NIL (N) = 0-9%	LOW (L) = 10-40%	MEDIUM (M) = 40-70%	HIGH (H) = >70%	

Rail, LUL & Bus Industrial Action

Expected Service Summary

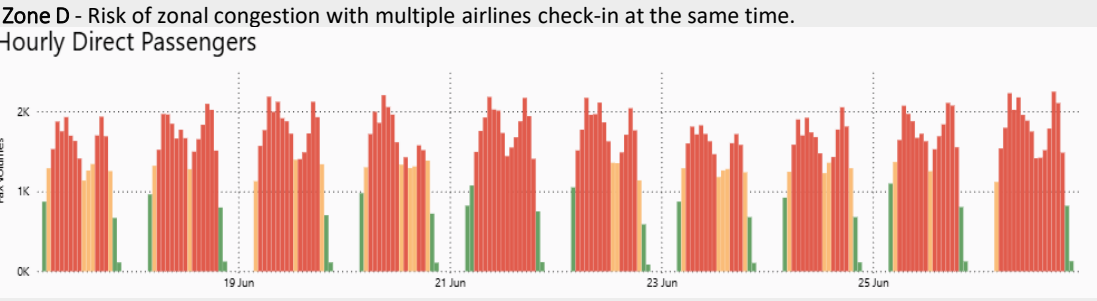

Date	Hex	Elizabeth Line (EL)	Piccadilly Line (LUL)	Bus	Road	Inter-terminal transfers

Saturday 20 th	Normal Service	Normal Service	Normal service			Normal Service
Sunday 21 st	Normal Service	Normal Service	Normal service			Normal Service
Monday 22 nd	Planned railway upgrade work From London Paddington: The 23:10 service is cancelled. From Heathrow Terminal 5: The 23:42 service is cancelled. From Heathrow Central: The 23:47 service is cancelled.	Normal Service	Normal service			Normal Service
Tuesday 23 rd	Planned railway upgrade work From London Paddington: The 23:10 service is cancelled. From Heathrow Terminal 5: The 23:42 service is cancelled. From Heathrow Central: The 23:47 service is cancelled.	Normal Service	Normal Service			Normal Service

Operational Risks

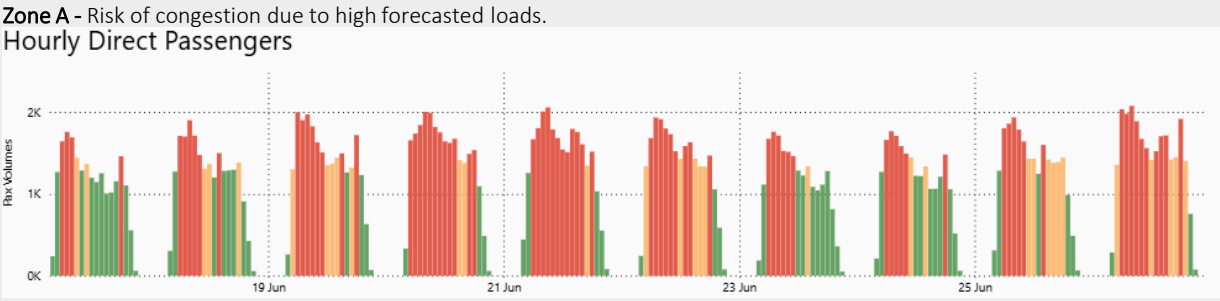

- At times with no service on the Piccadilly Line or Elizabeth Line, other services will be busier than usual and additional pressures will be seen on alternative modes of transport.
- Routes to and from the airport to be heavily congested, including buses, coaches and any rail services that are operating.
- The road network expected to be very busy, along with our multi-storey car parks.
- Colleagues and passengers may be late for shifts and their flights due to congestion and road closures.

For any operational queries with regards to D-1 or ‘On the Day’ please contact Operational.Planning@Heathrow.com. For all other queries please contact Check-In.Planning@Heathrow.com.

T3			Zone A - AM	Zone A - AM	Zone A - AM				Zone A - AM	Zone A - AM
T4										
T5										

Green: There is a low risk of congestion in check-in areas. / **Amber:** Check-in queues are expected to be contained within overflow mazes and require monitoring. / **Red:** There is a high risk of landside congestion. Further intervention is required to prevent forecourt congestion.

Security Headlines (updated)

- No major concerns to call out for the next 10 days
- Terminal 4 has the highest risk of queues out of all the Terminals with a risk of 5-7-minute queues. These queues are low risk as there are additional lanes available due to the CT lanes going live today (17th June)
- No resource concerns for the next 10 days.
- No post closures planned.

Terminal 2 (updated)

- No operational concerns to call out with planned queues remaining below 5-minutes for the next 10 days.

Terminal 3 (updated)

- No operational concerns to call out with planned queues remaining below 5-minutes for the next 10 days.

Terminal 4 (updated)

- No operational concerns to call out with planned queues remaining below 5-minutes for the next 10 days.
- The queues in the plan currently can be mitigated due to additional lanes being available at the times of the queues which are a mixture of start up or handover queueing.
- FCC spikes are for a 15-minute period, so these risks are unlikely to materialise but is expected to be busy

Terminal 5 (updated)

- Weekend expected to be busier as the forecast increases to 50k+. This is driving some of the 2–3-minute queues in the plan
- Lane faults will add to the risk across these days.

MAX Queue Time

The queue times below do not represent the final published plan. It is likely that the current queue times below are unmitigated. Any queues in Fast Track will be mitigated by utilising economy capacity.

Heathrow Baggage

Updated – 16th June 2026

Terminal 2
Forecast check-in demand shows no breaches of 2,000 bph threshold for the next 10 days.

Terminal 3
Total outbound hourly demand is not expected to exceed the 2.7k bph amber threshold. No major concerns regarding reclaim hall congestion, potential focus hours is 0700-0800 depending on immigration waiting times. Alaska airlines AS101 started on 22/05 - operational situation under monitoring, possible changes to Menzies plan are necessary.

Terminal 4
Forecast check-in demand shows no breaches of 2,000 bph threshold for the next 10 days. Potential reclaim hall congestion between 0600-0800 & 1600-1800 daily due to high inbound bag volumes combined with Immigration waiting times, especially NEEA). Air Serbia (JU) handler change from Cobalt to Swissport from Monday 29th June.

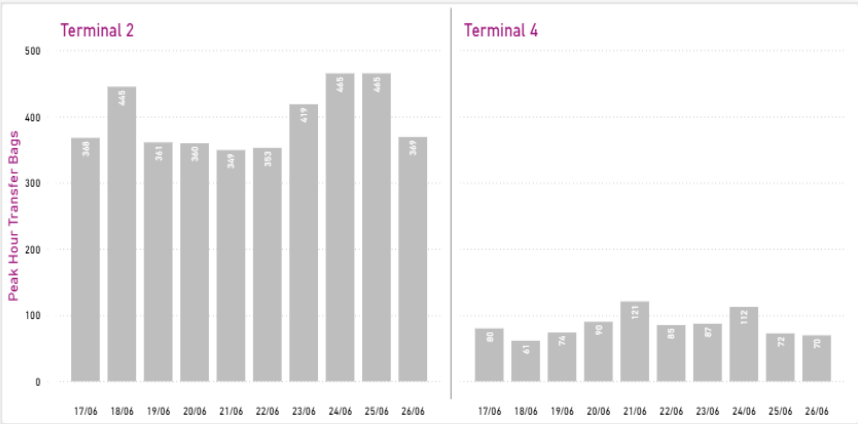

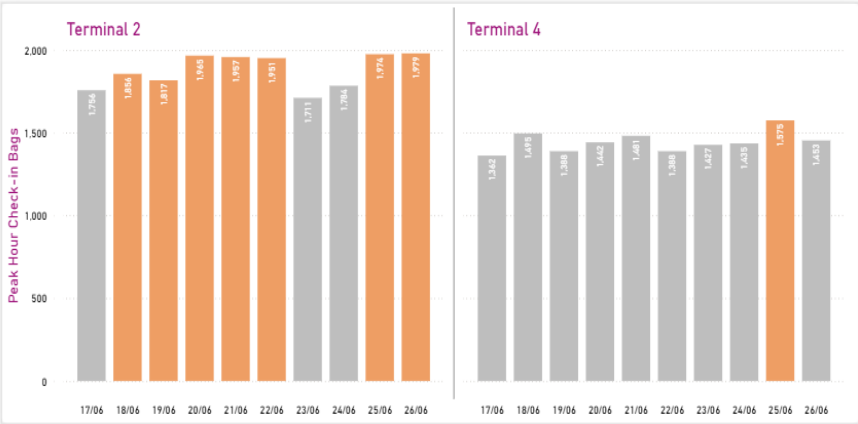

Terminal 5
Total hourly outbound demand expected to exceed amber threshold 3.2K bph across multiple days and red hourly threshold 4K bph expected to breach from 20th to 21st and 27th to 28th June between 07:00 and 08:00. Total outbound volume expected to exceed 44K bag threshold from 19th to 21st June and 27th to 28th June, operating model will be DDB4a/Conventional build to ensure smooth flows of EBS In/Out.

Faults or other issues

HBS Screener Resource	Screener resource in T3 to be monitored.
Early Bag Store	Demand monitored and build plans calibrated where necessary.

Baggage

Classification: Public

Note

RAG status of histograms refer to peak hour thresholds, RAG status in the table refer to daily thresholds. Direct and transfer shown separately for T2 and T4, total outbound shown for T3 and T5 (due to system configuration)

Terminal 2

- Pier Service Forecast: 98-99%
- T2 Pier-Served Stands are at capacity during peak periods (07:00-09:00 and 18:00-20:00 local time).
- Narrow-Body (NB) Aircraft Demand is higher during morning and evening periods, to mitigate ground holding after landing and TSAT delays - NB flights will be pre-planned in T2B.
- Stand 223 continues to have the Airbridge out of service

Terminal 3

- Pier Service Forecast: 95%
- Stand 305 is now closed for a full stand refurbishment
- Delayed tows will result in ground-holding and significant stand changes.
- Stand allocations are managed dynamically with the aim to limit the remote operation while considering the share the pain principle.
- Deviations from the schedule will likely lead to stand changes or remote operations
- Congestion expected until early afternoon, where stand allocations are less resilient

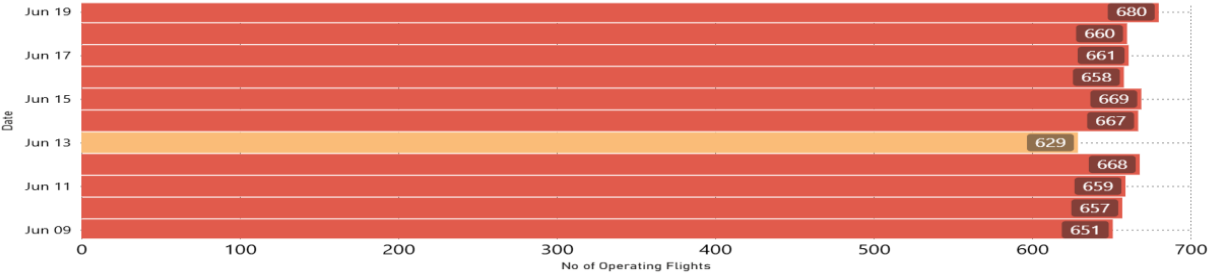

Terminal 4

- Pier Service Forecast: 100%
 - T4 Full house in the evening
 - Some carriers are opting to use the Victor Pier to mitigate towing
- Stand 424 shall be closed for daytime maintenance and taken out of service on the 24th Jun 2026**

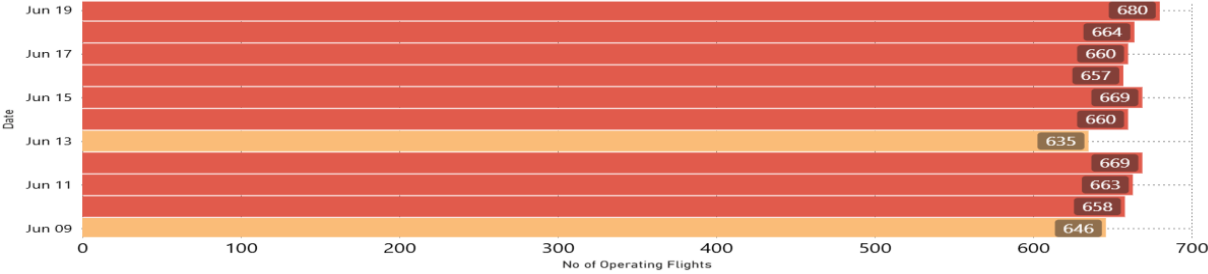

Terminal 5

- Core operational hours
- 06:00-09:00 FW departing/arriving flights
 - 12:00-14:00 focus 2nd operational wave SH product overlays with the LH schedule.
